DETAILED ACTION

Claims 13-18 are presented for examination.

Claims 1-12 were cancelled pursuant to the Preliminary Amendment dated September 29, 2005.

Requirement for Election/Restriction

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are compounds of formula (I) as set forth in instant claim 13.

The following claims are generic to these species: claims 13-14 and 16-18.

Applicant is required to elect a single disclosed specie of compound of formula (I) from those specifically claimed in instant claim 13.

Applicant is also notified that, *in order for the reply to be considered compliant with the instructions set forth herein*, the identity of each substituent (e.g., R1, R2, R3, R4, etc.) within the elected single disclosed specie **MUST** be provided, as well as a structural depiction of the single disclosed specie. Failure to provide each of these components will render the reply non-compliant.

Applicant is cautioned that the election of a particular specie of compound of formula (I), wherein the elected specie(s) is/are not adequately supported by the accompanying specification, may raise an issue of new matter under the written description requirement of 35 U.S.C. 112, first paragraph.

The species of compounds of formula (I) listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Applicant's attention is directed to Yale et al. (see U.S. Patent No. 3,194,733; 1965) to show that compounds of the instantly claimed structure were known in the prior art (see, specifically, col.1, l.18-37, which discloses a core structure identical to that instantly claimed, wherein R1 is, *inter alia*, hydrogen, halogen, lower alkyl, etc.; A is a straight alkylene chain of 3

Art Unit: 1614

carbon atoms; R2, R3, R4 and R5 are each hydrogen; R6 is $\text{CH}_2\text{-CH}_2\text{-OR}_7$, wherein R7 is COR8, and R8 is a straight or branched chain alkyl of 7-14 carbon atoms) and, thus, this alleged special technical feature of the presently claimed invention cannot be the unifying feature of the presently claimed subject matter because it fails to demonstrate a contribution over what was already known in the prior art at the time of the invention

Applicant is required, in reply to this action, to elect species consistent with the above instructions to which the claims shall be restricted if no generic claim is finally held to be allowable.

The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, Applicant must indicate which are readable upon the elected species. See MPEP § 809.02(a).

The election of species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 C.F.R. 1.144.

Should Applicant traverse on the ground that the species are not patentably distinct, Applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the Examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
